PROFESSIONAL SUMMARY

Frontend-focused developer skilled in React.js with strong foundations in Java and Data Structures & Algorithms. Built responsive web applications and currently expanding into full-stack development using Node.js and Express.js. Passionate about problem-solving and scalable software development with 150+ problems solved on LeetCode and GeeksforGeeks combined.

EDUCATION

PSNA College of Engineering and Technology, Dindigul

2022 – 2026

B.Tech in Computer Science and Business Systems

CGPA: 7.96 (up to 7th semester)

Saradha Vidhyalaya Matric Hr. Sec. School

2019 – 2022

Class 12: 84.16% | Class 10: 71.4%

EXPERIENCE

Web Developer Intern

June 2025 – July 2025

ST Software Solutions

- Developed responsive UI components and implemented CSS animations for client projects.
- Collaborated with designers to enhance UI/UX and optimize layouts for cross-device compatibility.

PROJECTS

Optimized IoT-based Car Parking System | *Arduino, Python, OpenCV*

- Designed and implemented an IoT-based smart parking system using Arduino, ultrasonic sensors, and OpenCV-based facial recognition for secure access control.
- Automated gate control using servo motors and real-time parking availability display, improving security and space utilization.

E-commerce Website | *HTML, CSS, JavaScript*

- Developed a responsive e-commerce platform with dynamic product listings and shopping cart functionality.
- Implemented client-side authentication and local storage-based session handling.

Money Manager Web Application | *React.js, JavaScript, HTML, CSS*

Live Demo

- Developed a financial management web application to manage personal and office transactions efficiently.
- Implemented dashboard analytics including month-wise, week-wise, and year-wise income and expenditure summaries with category insights.
- Designed reusable React components with state management and deployed the application on Vercel for production use.

TECHNICAL SKILLS

Programming Languages: Java, Python, JavaScript

Frontend: HTML, CSS, React.js

Backend: Node.js, Express.js

Core Concepts: Data Structures & Algorithms, Object-Oriented Programming

Tools: Git, GitHub, VS Code, IntelliJ IDEA

CERTIFICATIONS

Java Programming Certification — Udemy

Java and SQL Certification — CodeChef

IoT and Embedded Systems Workshop — PSNA College of Engineering and Technology
